This document includes licensing information relating to free, open-source, and public-source software included with or used in connection with the Intel conectivity wireless firmware code (hereafter, the "Software"). The terms of the applicable free, open-source, and public-source licenses govern Intel's distribution and your use of the Software. Intel, and the third-party authors, licensors, and distributors of the Software disclaim all warranties and liability arising from any and all use and distribution of the Software. Intel has reproduced below copyright and other licensing notices appearing within some or all of the Software. While Intel seeks to provide complete and accurate copyright and licensing information for each item of Software, Intel does not represent or warrant that the following information is complete, correct, or error-free. Software recipients are encouraged to (a) investigate the identified Software packages to confirm the accuracy of the licensing information provided herein. Certain open source software licenses (such as the GNU General Public Licenses, GNU Library/Lesser General Public Licenses, Affero General Public Licenses, Mozilla Public Licenses, Common Development and Distribution Licenses, Common Public License, and Eclipse Public License) require that the source code corresponding to distributed OSS binaries be made available to recipients or other requestors under the terms of the sameopen source software license. To the extend such source code is not provided with the delivery of the Software, such source code can be requested from Intel.

---
libsupc++

Project homepage/download site: https://gcc.gnu.org/
Project licensing notices:
Copyright (C) 1994-2016 Free Software Foundation, Inc.
This file is part of GCC.
GCC is free software; you can redistribute it and/or modify it under the
terms of the GNU General Public License as published by the Free Software
Foundation; either version 3, or (at your option) any later version.
GCC is distributed in the hope that it will be useful, but WITHOUT ANY
WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR

A PARTICULAR PURPOSE. See the GNU General Public License for more details.
Under Section 7 of GPL version 3, you are granted additional permissions
described in the GCC Runtime Library Exception, version 3.1, as published by
the Free Software Foundation.
You should have received a copy of the GNU General Public License and a copy
of the GCC Runtime Library Exception along with this program; see the files
COPYING3 and COPYING.RUNTIME respectively. If not, see
<http://www.gnu.org/licenses/>.
GCC RUNTIME LIBRARY EXCEPTION
Version 3.1, 31 March 2009
Copyright (C) 2009 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies of this license
document, but changing it is not allowed.
This GCC Runtime Library Exception ("Exception") is an additional permission
under section 7 of the GNU General Public License, version 3 ("GPLv3"). It
applies to a given file (the "Runtime Library") that bears a notice placed by
the copyright holder of the file stating that the file is governed by GPLv3
along with this Exception.
When you use GCC to compile a program, GCC may combine portions of certain
GCC header files and runtime libraries with the compiled program. The purpose
of this Exception is to allow compilation of non-GPL (including proprietary)
programs to use, in this way, the header files and runtime libraries covered
by this Exception.
0. Definitions.
A file is an "Independent Module" if it either requires the Runtime Library
for execution after a Compilation Process, or makes use of an interface
provided by the Runtime Library, but is not otherwise based on the Runtime
Library.
"GCC" means a version of the GNU Compiler Collection, with or without
modifications, governed by version 3 (or a specified later version) of the
GNU General Public License (GPL) with the option of using any subsequent
versions published by the FSF.
"GPL-compatible Software" is software whose conditions of propagation,
modification and use would permit combination with GCC in accord with the
license of GCC.
"Target Code" refers to output from any compiler for a real or virtual target
processor architecture, in executable form or suitable for input to an
assembler, loader, linker and/or execution phase. Notwithstanding that,
Target Code does not include data in any format that is used as a compiler
intermediate representation, or used for producing a compiler intermediate
representation.
The "Compilation Process" transforms code entirely represented in nonintermediate
languages designed for human-written code, and/or in Java
Virtual Machine byte code, into Target Code. Thus, for example, use of source
code generators and preprocessors need not be considered part of the
Compilation Process, since the Compilation Process can be understood as
starting with the output of the generators or preprocessors.
A Compilation Process is "Eligible" if it is done using GCC, alone or with
other GPL-compatible software, or if it is done without using any work based
on GCC. For example, using non-GPL-compatible Software to optimize any GCC

intermediate representations would not qualify as an Eligible Compilation Process.
1. Grant of Additional Permission.
You have permission to propagate a work of Target Code formed by combining the Runtime Library with Independent Modules, even if such propagation would otherwise violate the terms of GPLv3, provided that all Target Code was generated by Eligible Compilation Processes. You may then convey such a combination under terms of your choice, consistent with the licensing of the Independent Modules.
2. No Weakening of GCC Copyleft.
The availability of this Exception does not imply any general presumption that third-party software is unaffected by the copyleft requirements of the license of GCC

=============== Duktape authors ===============
Copyright =========
Duktape copyrights are held by its authors. Each author has a copyright to their contribution, and agrees to irrevocably license the contribution under the Duktape ``LICENSE.txt``.
Authors =======

Please include an e-mail address, a link to your GitHub profile, or something similar to allow your contribution to be identified accurately.
The following people have contributed code, website contents, or Wiki contents, and agreed to irrevocably license their contributions under the Duktape ``LICENSE.txt`` (in order of appearance):
* Sami Vaarala <sami.vaarala@iki.fi> * Niki Dobrev * Andreas Öman <andreas@lonelycoder.com> * László Langó <llango.uszeged@partner.samsung.com> * Legimet <legimet.calc@gmail.com> * Karl Skomski <karl@skomski.com> * Bruce Pascoe <fatcerberus1@gmail.com> * René Hollander <rene@rene8888.at> * Julien Hamaide (https://github.com/crazyjul) * Sebastian Götte (https://github.com/jaseg)
Other contributions ==========
The following people have contributed something other than code (e.g. reported bugs, provided ideas, etc; roughly in order of appearance):
* Greg Burns * Anthony Rabine * Carlos Costa * Aurélien Bouilland * Preet Desai (Pris Matic) * judofyr (http://www.reddit.com/user/judofyr) * Jason Woofenden * Michał Przybyś * Anthony Howe * Conrad Pankoff * Jim Schimpf * Rajaran Gaunker (https://github.com/zimbabao) * Andreas Öman * Doug Sanden * Josh Engebretson (https://github.com/JoshEngebretson) * Remo Eichenberger (https://github.com/remoe) * Mamod Mehyar (https://github.com/mamod) * David Demelier (https://github.com/markand) * Tim Caswell (https://github.com/creationix) * Mitchell Blank Jr (https://github.com/mitchblank) * https://github.com/yushli * Seo Sanghyeon (https://github.com/sanxiyn) * Han ChoongWoo (https://github.com/tunz) * Joshua Peek (https://github.com/josh) * Bruce E. Pascoe (https://github.com/fatcerberus) * https://github.com/Kelledin * https://github.com/sstruchtrup * Michael Drake (https://github.com/tlsa) * https://github.com/chris-y * Laurent Zubiaur (https://github.com/lzubiaur) * Ole André Vadla Ravnås (https://github.com/oleavr)
If you are accidentally missing from this list, send me an e-mail (``sami.vaarala@iki.fi``) and I'll fix the omission.

Caffe

Project homepage/download site: https://github.com/BVLC/caffe/tree/master/models
Project licensing notices: https://github.com/BVLC/caffe/blob/master/LICENSE

CONTRIBUTION AGREEMENT
By contributing to the BVLC/caffe repository through pull-request, comment, or otherwise, the contributor releases their content to the license and copyright terms herein.

Autoconf

Project homepage/download site: http://www.gnu.org/software/autoconf/
Project licensing notices: https://www.gnu.org/licenses/autoconf-exception.html
AUTOCONF CONFIGURE SCRIPT EXCEPTION
Version 3.0, 18 August 2009
Copyright © 2009 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.
This Exception is an additional permission under section 7 of the GNU General Public License, version 3 ("GPLv3"). It applies to a given file that bears a notice placed by the copyright holder of the file stating that the file is governed by GPLv3 along with this Exception.
The purpose of this Exception is to allow distribution of Autoconf's typical output under terms of the recipient's choice (including proprietary).
0. Definitions.
"Covered Code" is the source or object code of a version of Autoconf that is a covered work under this License.
"Normally Copied Code" for a version of Autoconf means all parts of its Covered Code which that version can copy from its code (i.e., not from its input file) into its minimally verbose, non-debugging and non-tracing output.
"Ineligible Code" is Covered Code that is not Normally Copied Code.

1. Grant of Additional Permission.
You have permission to propagate output of Autoconf, even if such propagation would otherwise violate the terms of GPLv3. However, if by modifying Autoconf you cause any Ineligible Code of the version you received to become Normally Copied Code of your modified version, then you void this Exception for the resulting covered work. If you convey that resulting covered work, you must remove this Exception in accordance with the second paragraph of Section 7 of GPLv3.
2. No Weakening of Autoconf Copyleft.
The availability of this Exception does not imply any general presumption that third-party software is unaffected by the copyleft requirements of the license of Autoconf.

Cython

Project homepage/download site: http://cython.org
Project licensing notices: https://github.com/cython/cython/blob/master/LICENSE.txt
COPYING.txt
The original Pyrex code as of 2006-04 is licensed under the following license: "Copyright stuff: Pyrex is free of restrictions. You may use, redistribute, modify and distribute modified versions."

Cython, which derives from Pyrex, is licensed under the Apache 2.0 Software License. More precisely, all modifications and new code made to go from Pyrex to Cython are so licensed.
See LICENSE.txt for more details.

The output of a Cython compilation is NOT considered a derivative work of Cython. Specifically, though the compilation process may embed snippets of varying lengths into the final output, these snippets, as embedded in the output, do not encumber the resulting output with any license restrictions.
